Experience

Software Developer at Nulab, Tokyo 9/2017 -- Present

I worked in Typetalk development team. Typetalk is a chat application for business. My responsibility was to develop front-end/back-end of Typetalk and replying to the customer's inquiries.

- Developed new features including topics grouping and organization switching.
- Improved back-end unit testing speed for 10~20%.
- Introduced ESLint for front-end development.

Product Engineer at LexisNexis, Tokyo 4/2015 -- 8/2017

I worked in ASOne development team. ASOne is Japanese law database for lawyers and legal departments. My responsibility was to develop the application cooperating with China and Philippine, the U.S team.

- Developed applications for editor team.
- Maintained legacy applications written in Perl.
- Created data specification for Lexis AS ONE Compliance Manager.

Security Engineer at Appirits, Tokyo 5/2014 -- 3/2015

I worked in a security team. My responsibility was to do penetration testing.

- Worked on penetration test for web applications and its infrastructure.
- Created documents and reported the vulnerabilities.

System Administrator at Human Resocia, Tokyo 8/2013 -- 12/2013

My responsibility was to deploy jobs and maintain an application.

- Maintained insurance management application.
